 Bangalore

Education

B.Sc. Computer Science
2019
Dhenkanal Autonomous College,
Dhenkanal

Skills

- React.js, Angular
- ASP.NET Core
- C# , C++
- System Design
- Azure DevOps, Docker
- Azure OpenAI, LLM, NLP
- Microservices
- Restful APIs , Web API
- SQL Server
- Data Structures & Algorithms
- SOLID Principles
- Design Patterns
- Unit Testing

Languages

English, Hindi, Oriya

Profile

Results-driven Software Engineer with 6.6 years of experience in full-stack development using .NET, React, Angular, SQL Server, and Azure. Strong expertise in DSA, OOP, and scalable system design, delivering reliable, high-performance applications and business-critical solutions. Experienced in building cloud-native and microservices-based architectures.

Employment

Senior Software Developer
Primus Global Technologies PVT Ltd, Bengaluru
Client - **Society Generale**

May 2024 - Present

- Developed and maintained enterprise-grade, full-stack applications using .NET Core 10, Python, Sql, Angular, and React.js .
- Led the end-to-end development of a greenfield application, from requirement gathering and architecture design to deployment and production support.
- Ensured adherence to coding standards, design principles, and engineering best practices across the development lifecycle.
- Deployed applications using Azure App Services, Functions, and containerized architectures for cloud-native solutions.
- Collaborated with stakeholders, business analysts, and QA teams to deliver features on schedule and with high quality.
- Automated deployment and operational processes using Azure DevOps, Docker, and CI/CD pipelines, reducing manual effort and release time.
- Implemented AI-powered document processing and data extraction workflows to improve operational efficiency and data accuracy.

Full Stack Developer
Harman Connected Services, Bengaluru

May 2023 - May 2024

- Developed responsive and dynamic user interfaces using ASP.NET MVC, Blazor, Angular, React.js, and jQuery.
- Built robust backend APIs using ASP.NET Core Web API and C#, and managed SQL Server databases with stored procedures, views, and functions.
- Designed and implemented scalable Microservices-based solutions, improving application maintainability, scalability, and deployment efficiency.
- Built a reusable C# data migration utility for importing CSV and Excel files, streamlining large-scale data onboarding processes.

Junior Software Developer
Sentiicare Pvt Ltd, Banglore

Nov 2019 - Apr 2023

- Built full-stack healthcare web applications for state-level government projects using ASP.NET Core, Angular (7.8), React.js(16) and SQL Server.
- Designed and developed RESTful APIs and backend services in C# to support patient management and real-time data operations.
- Built cross-platform mobile apps with React Native and Java to streamline healthcare workflows, enabling real-time data access and boosting adoption in rural health centers.
- Created data visualization modules with charts, data grids, and export-to-Excel/PDF functionality for medical reporting.
- Integrated Google APIs to build voice-enabled features and nearby hospital search screens, enhancing accessibility and usability for healthcare workers.
- Deployed applications on Linux-based environments using PuTTY, FileZilla, and shell scripting for manual server management.
- Collaborated within Agile teams, using GitHub, Bitbucket, and Jira for version control, task management, and sprint delivery.
